## Some additional comments and feedback

"The staff are amazing and the care is personal. I don't feel like mum is just a number. They all know her, her needs and all have a laugh and joke which makes her feel involved".

"Staff are caring, compassionate people who care for the residents most efficiently in a warm and friendly manner".

"I feel like this is my family, I feel safe and involved. There are caring staff".

## Respondents thought we could improve on these services

We received some comments about our meals and this feedback is something that we will be working hard with our staff to rectify. Our meals are nutritionally balanced and meet the dietary needs of our residents, but we need to continue to expand them.

While our domestic service received a good result we received comments regarding the laundry service. This is always a very personal issue and we will be working on closer consultation with our residents on this issue.

We had feedback about residents continuing their interests and social contact in the community. It is important for our residents to make the most of their home and we will be expanding our activities.
